

COMMUNITY NEWS UPDATE

2020 has seen new tenants begin operating from Moorebank Logistics Park, and continuing progress towards automation of our rail terminal with installation of these Kalmar gantry cranes.

Best wishes from Moorebank Logistics Park

As this very challenging year comes to an end, we would like to wish all in our neighbouring communities a safe and happy holiday season.

While so many industries and lives have been disrupted, the Moorebank Logistics Park has been fortunate to be able to maintain its operations and continue construction activities to support hundreds of jobs and significant ongoing investment in the local economy. For the project to date, this has seen Qube and its contractors spend 28% of all project investment with businesses large and small from within the Liverpool, Campbelltown, Fairfield and Canterbury Bankstown council areas.

Significant progress has been made on completing more warehousing, seeing new businesses commence operations on the site, and work has also commenced on road upgrades along the existing Moorebank Avenue.

We are also working with Transport for NSW to coordinate the road works the project is required to fund and deliver with the NSW Government's recently announced M5 Motorway upgrade project.

A number of training and education initiatives have also been undertaken during the year. Most recently Qube partnered with TAFE to showcase the job opportunities in the logistics industry and encourage local students to explore the courses available and consider logistics as a career path (see article on the back page).

We look forward to continuing working with all our neighbouring local communities in 2021.

Our 2020 progress in pictures

Our contractor BMD has made great progress through 2020 preparing for the upgrade of Moorebank Avenue, with construction of the temporary diversion on the western side of the road.

Two new warehouses have been completed on Moorebank Precinct East in 2020, with a third in the final stages of construction. New tenants are now operating from the site, joining Target, which was the first tenant to call Moorebank Logistics Park home.

Our Registered Aboriginal Parties were on-site in November to supervise relocation of two Scarred Trees, with Tharawal Land Council taking ownership of the pieces.

A significant amount of our work on Moorebank Precinct West in 2020 has been in preparation of the site for Woolworths' two new distribution centres, which will cover a significant portion of the centre of our site next to the future interstate rail terminal.

Qube gave high school students an insight into a career in freight and logistics through Green Light Day 2020.

Green Light Day embraces freight workers of the future

Green Light Day is a collaborative initiative between the NSW Government and industry, aimed at promoting careers in transport and logistics. More than 500,000 people – almost 14 per cent of the NSW workforce – are employed in transport and logistics.

Targeting high school students in years 9 to 12, Green Light Day provides interested students with an opportunity to get hands-on experience in a transport and logistics career.

Qube is proud to be contributing to Green Light Day this year, by providing students throughout Sydney and regional NSW with the opportunity to get a first-hand look at roles within the transport and logistics industry, including logistics managers, freight loaders, forklift operators as well as train and truck drivers. The event was streamed live from Moorebank Logistics Park on Friday and more than 500 students registered their interest to attend.

Green Light Day is coordinated by TAFE NSW, the NSW Department of Education, and Transport for NSW.

Holiday construction

Our contractors will be working reduced days during the Christmas and New Year holiday period.

Activity will occur until around lunchtime on Wednesday **December 23**, daytime work will occur from **December 29-31** and then regular construction hours will return from Monday 4 January.

If you have any questions about construction of our project, call **1800 986 465** or email **simta@elton.com.au**.
